

VAC B 4 60

Lightweight polyester breather fabric

Production Description

Lightweight polyester breather fabric - 150g/m² (4.4oz/sqYd)
roll size 1.52 metres wide x 100 metres long

General Description

Needled, polyester fabric for use as a highly drapable, breather / absorption medium in composite vacuum bagging applications. The breather fabric should be separated from the composite laminate by a release material.

Colour

White

TECHNICAL DATA

Material fibre

100% polyester

Nominal weight

150 g/m²

Nominal thickness

2.5mm (uncompressed)

Maximum Usage Temperature:

200°C

FURTHER INFORMATION - PROCESSING DETAILS

Please contact Amber Composites for further information.

This is not a specification. The information given in this data sheet in relation to the performance, storage and other characteristics of the product is based on results gained from experience and tests and is believed to be accurate. Given, however, that conditions of use and storage will vary, Amber Composites will not be liable for any loss or damage resulting from reliance upon such information. The purchaser is recommended to carry out his own tests to establish the suitability of the product for its particular purpose. The use of the product in certain processes may require third party consent.
