

## **Amber Composites Launches New Website**

August 5, 2008 - Amber Composites announced the launch of their new global website today. The site has been completely redesigned to make it simpler for users to source composite materials. The new site provides information and guidance on the use of a wide range of materials including adhesives, rapid prototyping and tooling products, as well as Amber's complete line of prepreg and lightweight core material. Customers worldwide will now find it easier to access Amber's solutions and expertise with lightweight, high-performance materials.

"The new website delivers a clear picture of our high-performance solutions. Amber's experience with demanding applications, as demonstrated in case studies now available on the website, gives new customers insight into the technical competence and support available from the Amber team," said Jonathan McQueen, Amber Composites CEO.

Highlights of the new site include:

- Easy to navigate
- Case studies from multiple industries
- Prepreg guide to help users find the best material for their application
- Region-specific product information

The new site can be found at [www.ambercomposites.com](http://www.ambercomposites.com).

### **About Amber Composites**

Amber Composites is a leading manufacturer of composite materials for the creation of high performance, lightweight structures. With over 20 years of experience, Amber provides materials and technical expertise to a diverse set of industries, including motorsport, automotive, aerospace, communications, marine and wind energy.
