

AMBER COMPOSITES LAUNCHES OWN LINE OF CONSUMABLES

June 29, 2009

Amber Composites has launched a new line of consumable products for vacuum bagging in oven curing, autoclave and infusion processes. New products include breather, release films, vacuum bags, and quick fitting/release vacuum fittings.

The new consumable line is more cost-effective and complements Amber Composite's full range of high-performance prepreg and other composite materials for master, tool and part-making. It marks another step forward in Amber's drive to offer the composites market complete material solutions from design to volume production.

The new line is available on a just-in-time basis and sample packs are readily available. To discuss requirements please contact Amber Composites at sales@ambercomposites.com or call +44 (0)1773 530899.

About Amber Composites

Amber Composites is a leading manufacturer of composite materials for high performance, lightweight structures. Amber provides materials and technical expertise to a diverse set of industries, including motorsport, automotive, aerospace, communications, marine and wind energy.
